 Ceramica Globo, washbasin Display Collection by GamFratesi

April 14, 2016 | Designbest editorial staff

Refined aesthetics, clean shapes, simple yet functional designs; this is Display Collection. Display Collection is the latest line of washbasins by Ceramica Globo, launched at the 2016 Salone del Mobile, Milan. Display Collection includes both ultra-compact and large-scale designs, streamlined pieces with careful detailing like the built-in storage tray.

What is it? Display Collection by Ceramica Globo is a line of washbasins with built-in storage tray.

What is special about it? Clean and simple, Display Collection caught our eye with its attention to detail: off-kilter slimline overflow cover, built-in storage tray available in various sophisticated hues, separate storage compartments and flexible volumes. Display Collection brings together extreme versatility and pure minimalism, even so unpredictable.

How is it made? Display Collection includes 4 different crisply designed washbasins. Each design is available in two different styles, on top or wall-mounted and in four different sizes.

Stay tuned,

Designbest

Who is it by? Famous Italo-Danish design duo GamFratesi is best known around the world for: clean design aesthetics, product innovation, explosive creativity and adding a pinch of tradition.

We have chosen it because... Display Collection washbasins have an almost monolithic aesthetic, nonetheless they add a sophisticated touch to any bathroom, even the smallest of spaces. And what's more, they are elegant and extremely functional, so we have everything within reach.
