

## More hygiene and new design

The new SENZABRIDA® toilet bowl focuses on water flowing out in a single point at the rear of the bowl, eliminating the continuous perimeter rim to guarantee maximum hygiene and cleanliness. The water comes out silently in a circular downward flow to cover the bowl, allowing to deliver professional-level performances. This makes them ideal for both domestic and supply purposes.

## The new SENZABRIDA® 2.0

The renewed and improved SENZABRIDA® technology is now available for a greater number of wall-hung pans (4ALL, Bowl+, Forty3 and Daily), completely revolutionising the concept of toilet and water drainage systems. The shape studied for the water outlet improving the design of the product with a better aesthetic result and optimal water flow for an optimal hygiene.
