Bataform®

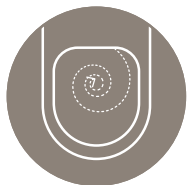

Per garantire una sempre maggiore attenzione all'igiene è stato sviluppato il trattamento antibatterico BATAFORM® un processo insito alla fase di produzione che grazie al suo potere antimicrobico riduce notevolmente la presenza di germi e batteri. I test di laboratorio effettuati secondo gli standard internazionali conformi alla normativa ISO 22196:2011 confermano un drastico calo della presenza di microbi.

The antibacterial BATAFORM® treatment was developed to ensure deeper hygiene, basing its effectiveness on the reaction of silver ions, which inhibit the proliferation of bacteria. Tests carried out by certified laboratories, according to the ISO 22196:2011, have confirmed a drastic decrease in the presence of bacteria, without however altering the glossy glaze.
